Benefits of Outsourcing Detailing to Holtec

- **High Client Commitment** : We maintain few clients but work very closely with these clients, continuously providing them superior service that they can depend upon.
- **High Accuracy** : All projects are executed through our ISO 9001 certified quality processes. Holtec's personnel have been trained in USA and on the AISC/NISD approved training program. Our in-house structural engineering capability allows us to comprehensively understand and execute projects.
- **Guaranteed Schedule** : Holtec has a unique web-based project and resource management system, which allows online control of projects and personnel working on projects. Our large staff size allows flexible deployment of personnel on projects as needed to meet tight client schedules.
- **Cost-reduction** : Detailing is done from our engineering center in India, which allows us to offer substantial cost-reduction over US rates.

Resources

- 300 + professionals.
- Experienced in American (AISC), Canadian, Japanese, German, French & British engineering & detailing standards.
- Modern IT infrastructure with redundant internet access, client accessible cloud server, on & off-site data backup, security procedures and Tekla + Advance Steel software for steel detailing.
- 52,000 ft² modern office space in two buildings with full power-backup and air-conditioning.
